

5 ADVANTAGES OF

THE TOTAL HOME ENERGY SYSTEM

FOR ECO-CONSCIOUS HOMEOWNERS

As solar power goes mainstream, many companies offer countless installation options. But all the choices can be overwhelming and confusing. Panasonic's total home energy system simplifies home solar while guaranteeing decades of sustainable living and energy savings.

1 THE PANASONIC TOTAL HOME ENERGY SYSTEM provides everything you need to power your home with renewable energy, all from one dependable company

High efficiency solar panels

High-output energy storage

TripleGuard 25-year warranty

3 LESS THAN 10% PERFORMANCE DEGRADATION AFTER 25 YEARS
All solar panels work well when new. But only the best-made modules generate power consistently over time. HIT[®] panels are quality-tested to provide one of the lowest degradation rates on the market. With a guaranteed minimum 90.76% rated power output after 25 years, you'll produce more free electricity year after year.

Low degradation rate
↓ ↑
high return on investment

2 STAY PREPARED AND INDEPENDENT
HIT[®] solar panels produce an abundance of electricity while the sun shines. EverVolt[™] battery storage lets you tap into your private energy reservoir when you need it most. EverVolt[™] stores the surplus energy your panels generate during the day for instant access at night, and during peak rate hours and power outages.

4 USE MORE SUSTAINABLE SOURCES & LESS FOSSIL FUELS

Produce & store your own renewable energy with zero emissions

Reduce dependence on the utility grid

Decrease your carbon footprint & save money year after year

5 PEACE OF MIND & LONG-TERM WARRANTY PROTECTION
A warranty is only as reliable as the company behind it. Our comprehensive solar panel warranty covers performance, workmanship, parts, and labor for 25 years* and EverVolt battery storage system for 10 years.
